5 Design given web pages using List tags, Audio tag, Video tag

Part : A

1) List tags

Concept of WWW

- It stands for World Wide Web.
- It is basically a system of internet servers that support specially formatted documents.
- It is a collection of text pages, videos, digital photographs and animations we can access over the internet.
- User access the World Wide Web facilities via client called a web browser.

HTTP Protocol

- I. HTTP stands for Hypertext Transfer Protocol.
- II. HTTP is based on the client-server architecture model and a stateless request/response protocol
- III. 404 File Not Found is a common HTTP status code.

BCA Sem-2 Subject List

HTML
HyperText Markup Language
CSS
Cascading Style Sheet
DBMS
Database Management System

2) Audio tag

HTML Audio Element

3) Video tag

HTML Video Element

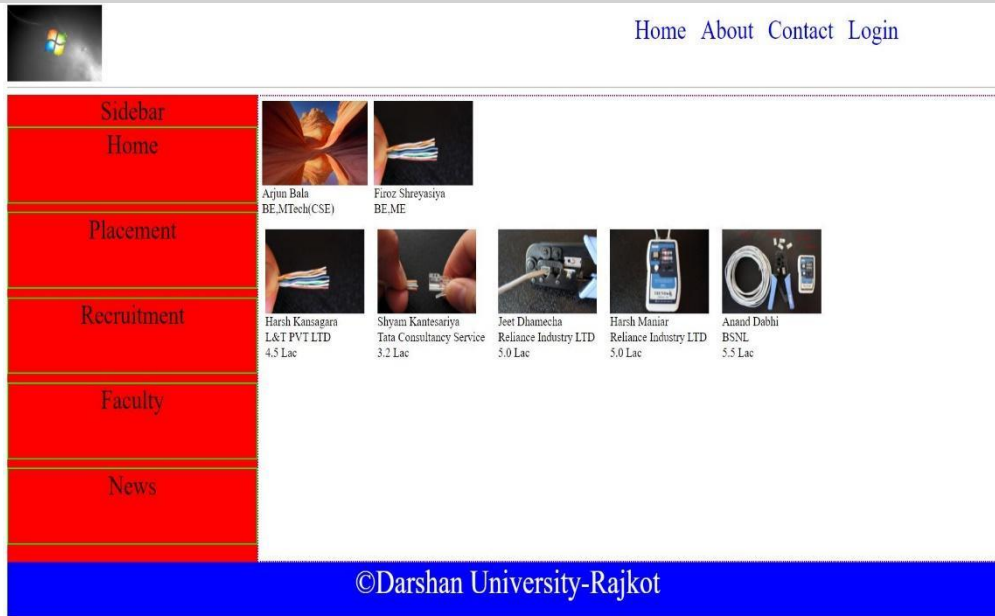

Lab No Practical

6 **Design given web pages using div tag and CSS properties.**
Part : A

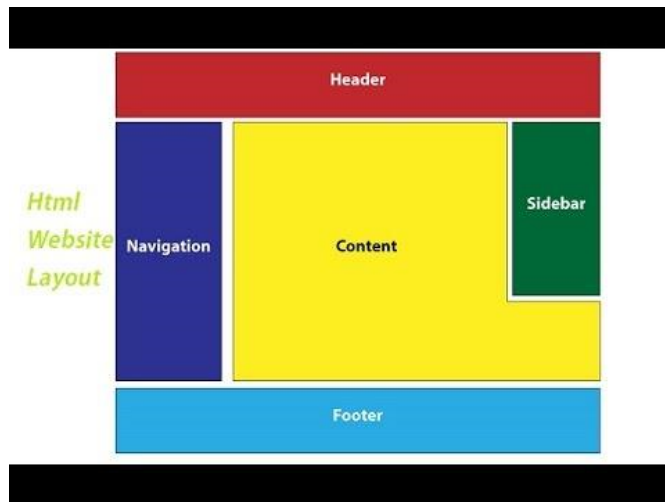

Part : B

Subject: 2301CS202 – Web Designing

Part : C

7 **Apply internal-external and inline style sheet on Practical No-6.**

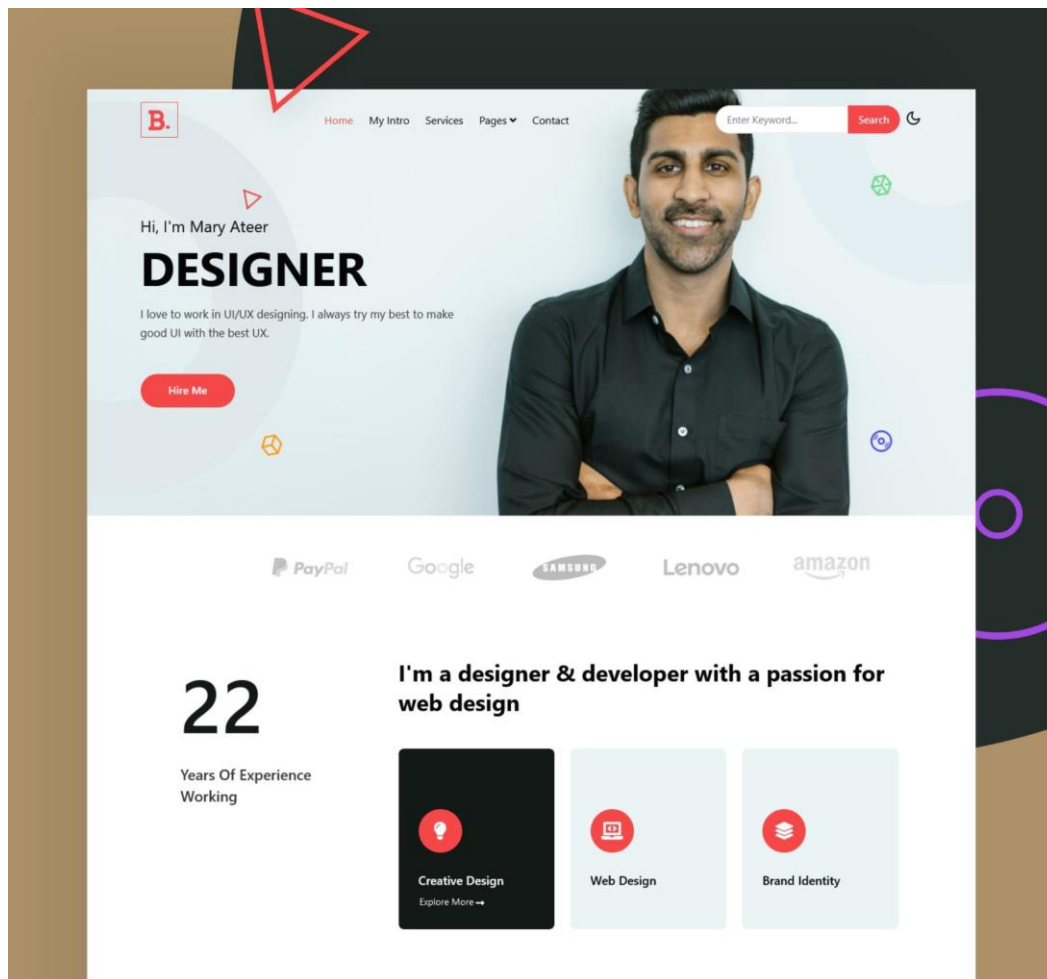

1. Layout part-A
2. Layout part-B
3. Layout part-C

8 **Build a following Personal portfolio webpage using HTML and CSS.**
Part : A

Subject: 2301CS202 – Web Designing

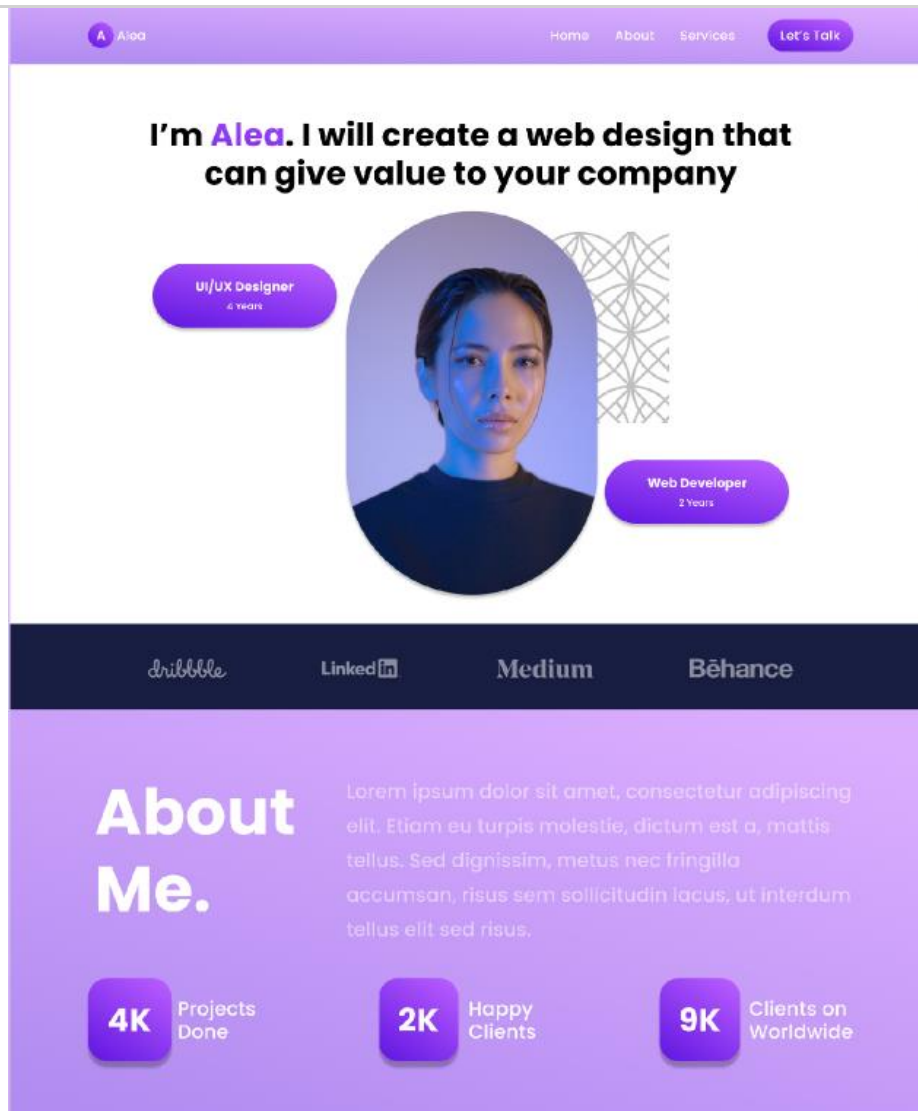

Part : B

Part : C

Subject: 2301CS202 – Web Designing

9 **Create web pages having given animation effects**

Part : A

1. Changing background color of div from red to yellow.
2. Moving div from Left to right, right to bottom, bottom to left and left to top.
3. Put delay of 2s in animation.
4. Change animation-iteration count property of program 2 to run infinite times
5. Change animation direction property to run it in reverse order.
6. Change value of animation-timing-function property to change the speed of animation

Part : B

1. Create custom animation of your choice.

Part : C

1. Create animation similar to screen saver.

10 **Apply Media Queries on Practical No-6 and make it responsive.**

1. Layout part-A
2. Layout part-B
3. Layout part-C

Subject: 2301CS202 – Web Designing

11 **Demonstrate Gradients in CSS.**

Part : A

Part : B

Part : C

Subject: 2301CS202 – Web Designing

12 **Create a web page using pseudo-classes and pseudo-elements having given effects.**

Part : A

1. Link after visited red color before visited orange color
2. Add special style(change color, font size etc.) to first line of paragraph
3. Add special style (change color, font size etc.) to first letter of paragraph
4. Change background color to yellow when user select particular text
5. Add special style to an element when user mouse over it.

Part : B

1. Using the :hover pseudo-class to change the appearance of links when hovered over, but limited to links within a specific container.
2. Applying styles to input fields when they receive focus using the :focus pseudo-class.
3. Utilize the :hover pseudo-class to highlight table rows when hovered over.

Part : C

1. Employing pseudo-classes such as :valid and :invalid to style form elements based on their validation status, aiding in providing feedback to users during form submission.
2. Applying pseudo-classes like :active to interactive elements such as buttons and toggles to visually indicate user interaction when activated or clicked.
3. Using pseudo-classes such as :focus to improve accessibility by indicating the currently focused element, aiding users who navigate through a website using keyboard-only inputs.

13 Build Below Homepage using HTML and CSS.
